CAREER OBJECTIVE

Motivated Computer Science undergraduate with a specialization in Internet of Things, backed by a solid understanding of software development and data structures. Aspiring to join a technology-focused organization to apply analytical thinking, develop scalable solutions, and grow as a software engineer.

EDUCATION

Noida Institute of Engineering and Technology	2023 - 2027
B.Tech – Internet of Things (IoT)	CGPA: 8.81
DAV Public School, Ballabhgarh	2022
Class XII (CBSE)	Percentage: 78%
DAV Public School, Ballabhgarh	2020
Class X (CBSE)	Percentage: 87.2%

TECHNICAL SKILLS

Languages: C++ (DSA), Python

Web: HTML, CSS

Database: MySQL

Tools: Git, GitHub, VS Code, Tableau

Core Concepts: Data Structures, Algorithms, OOP, DBMS, Computer Networks, Artificial Intelligence(AI),Machine Learning

PROJECTS

Dry & Wet Waste Segregation Smart Dustbin | IoT, Embedded Systems 2024

- Engineered an IoT-based automated waste classification system using sensors and microcontroller logic to segregate dry and wet waste , eliminating manual sorting.
- Integrated hardware-software pipeline to achieve reliable classification, demonstrating applied knowledge of embedded systems and smart city technologies.
- Designed modular firmware enabling easy sensor swap-out, improving system maintainability and scalability.

DriveGuard — AI Driver Safety Monitoring System | Python, OpenCV, YOLOv8, Flask 2026

- Developed a real-time system to detect drowsiness, yawning, head distraction, and phone usage using MediaPipe and YOLOv8.
- Implemented EAR, MAR, and head pose estimation for driver behavior analysis.
- Designed a fatigue scoring model (0–100) with risk classification and critical alert detection.
- Integrated voice alerts, email (SMTP), and Telegram notifications with location sharing.
- Built a Flask-based dashboard for live monitoring and session analytics.

INTERNSHIP EXPERIENCE

Python Programming Intern (Virtual) Remote

CodSoft 2024 — 1 Month

- Completed a virtual internship focused on Python programming, logic development, and software problem-solving.
- Developed multiple mini-projects encompassing core Python concepts such as file handling, OOP, and control flow, strengthening practical coding skills.
- Practiced writing clean, modular Python code and documented solutions to improve code structure and clarity.

CERTIFICATIONS

SQL Certification – Oracle

Networking with Cisco Packet Tracer – Cisco Networking Academy

AI Tools Workshop – Be10x

Internet of Things - Infosys
